Technical Support & Guarantee

All packages come with excellent support: Unlimited free text support. And with 12 months free LIVE-support (remote computer access) on a "fair use" policy. Zeus-soft guarantees that your software will receive free all needed updates for at least one year for any new OS Windows or MAC OS versions (e.g. if you might buy a new computer). Normally RadarOpus will remain to work for many years on the same OS version, especially on Windows.
There is no yearly license fees are needed. Occasionally a new module or a new Synthesis or other documents come available for very reasonable prices.

Installation

Install on Mac or Windows
From RadarOpus v 2.2 onwards, you can download and install RadarOpus on one computer with Soft-key protection. You can install on Mac or on Windows. If you like to work on two or three computers, then order a Mini USB key* protection, this allows to install and use on several computers if you move the mini usb key to the other computer. (* Ask for the additional costs).

Move your Soft-key license
If you want to move your Soft-key license to a different computer please contact us before you get rid of the old computer.
RadarOpus will develop a website soon, where you will be able to move your license yourself easily. You can move your license maximum 10 times for free (this will be for most people, for many years to come more than enough), if you need to move more often you will need to pay a small fee. A mini hard-key license can be moved between different computers an unlimited number of times.

Computer repair with Soft-key license
If your computer needs to be given for repair, it is best to uninstall your soft-key license first from this computer. The tech support will do this for you free of charge. With a Hard-key license there is no need to uninstall your license first.
