

About Dr Luc De Schepper

“Dr Luc” how all his patients called him, graduated in Belgium from the University of Ghent in 1975, and later moved to the USA and received his medical license in the state of State of California and New Jersey. After studying acupuncture and homeopathy, he specialized in homeopathie and researched the original works of Hahnemann. He found that the kind of homeopathy which is being taught often does not correspond at all to the original method of Hahnemann.

Dr Luc founded a homeopathic college “the New School of Homeopathy” in Cambridge in 1993, Massachusetts, USA, with over 200 students. He has been teaching all over the world and has published more than 12 books on acupuncture and homeopathy, the recent ones are “Hahnemann Revisited”, “Achieving and maintaining the simillimum”, “Discovering Life - Homeopathic Portraits” and “Examine your life through the Carpet Weaver of the Night”. During his 29 years of practice he has seen more than 200.000 patients and after his retirement from active practice he kept on treating patients, supervising difficult cases from his students, and teaching all over the world.
