- **Individual titles and modules:** see the AddOn pricelist
- The **Synthesis APP** can be purchased via the Apple and Android App-Shops

Purchase packages 2020

The purchase packages have a lot of benefit and discount. You become the owner, **no monthly rent fees**, and usually on the same computer (same OS version) will work many years. E.g. if you divide by e.g. 10 years (120 months) use, it is the most cheap and extended homeopathic software available. If needed cheap updates are available during your lifelong use.

These are the main packages:

We also offer some special packages for Midwives, Farmers, Murphy-users (see further below)
Please contact us for any question or advice.

Installation

Install on Mac or Windows

From RadarOpus v 2.2 can download and installed RadarOpus on one computer with Soft-key protection. You can install on Mac or on Windows. If you like to work on two or three computers, then order a mini usb key Hard-key license protection, this allows to install and use on several computers if you move the mini usb key to the other computer.

Move your Soft-key license

If you want to move your Soft-key license to a different computer, soon from RadarOpus v.2.3 onwards you can do this yourself easily by going to a license server website. You can move your license maximum 10 times for free (this will be for most people, for many years to come more than enough), if you need to move more often you will need to pay a small fee. A mini Hard-key license can be moved between different computers an unlimited number of times.

Computer repair with Soft-key license

If your computer needs to be given for repair, it is best to uninstall your soft-key license first from this computer. The tech support will do this for you free of charge. With a Hard-key license there is no need to uninstall your license first.
