PITCAIRN Richard & JENSEN Wendy New World Veterinary Repertory	 <p>Veterinarians Richard Pitcairn and Wendy Jensen, together with over 55 years experience in exclusively homeopathic practices, bring their knowledge of animal conditions and the correspondingly most applicable rubrics to this unparalleled reference work.</p> <p>The Boenninghausen repertory, edited by Boger, was the foundation for the work because of its emphasis on physical conditions and its skillful use of modalities and concomitants that are so necessary in veterinary work. After editing out the non-applicable material, rubrics especially helpful in animal cases were added or enlarged – primarily from Kent's repertory, but also from other sources including Jahr, Boger, Allen, Hering and Boericke. Extensive cross references were also added to make the discovery of the most similar rubric much easier than ever before.</p> <p>This work, the first of its type, will greatly enhance every homeopathic veterinarian's satisfaction and success in practice.</p>	Coming soon	159 (131,40 ex) Coming soon

HAHNEMANN Samuel , - Organon of the Medical Art: Wenda Brewster O'Reilly edition (2nd Ed.)	From Wenda Brewster O'Reilly "Samuel Hahenamn - Organon of the Medical Art: edition (2nd ed.) Based on treating the whole patient rather than isolated symptoms, homeopathy uses minute doses of naturally derived medicine to stimulate the patient's own life force. Physician Samuel Hahnemann's pioneering text Organon of the Medical Art, first published in 1810, remains the foundation for all study in this field. Wenda O'Reilly worked with translator Stephen Decker to produce a version of the book that would preserve Hahnemann's insights while adapting it to the needs of the modern general reader. The book is restructured as a series of chapters and sections, and newly added side notes and footnotes, a contextual glossary, and an index vastly increase the book's usefulness.		36 (29,75 ex)

LOGAN Robin , The Homeopathic Treatment of Eczema	Eczema is one of the most commonly encountered conditions in everyday practice and can pose difficult and perplexing problems for the homoeopath. This book sets out a practical basis for its treatment within the context of classical homeopathy. The author begins by defining the condition by reference to its conventional treatment, since most patients will have taken this route first and are likely to be familiar with the terminology of their diagnosis and the pharmaceutical preparations they have received. He then describes techniques of case-taking that are particularly appropriate to eczema. This is followed by a full discussion of case analysis, including the relevance of particulars in the hierarchy of symptoms and the subject of one-sided cases, or cases with few other symptoms, with a view to helping the reader to increase his or her own understanding of the issues involved. Further chapters cover all aspects of case management, among them suppression, aggravation, potency, repetition of the dose, adjunctive measures and commonsense advice. The overall discussion is supported by twenty-two case histories. The book concludes with a compact materia medica of forty-two remedies which the author has found to be of value in his own experience, studied under the headings of their characteristic physical, mental and general symptoms. There is a general index, a remedy index and a rubric index.		27 (22.32 ex)
KULKARNI T.P. , A Select Homeopathic Materia Medica (Part I+II)	Presents remedies in a methodical way by spanning the vast literature from Hahnemann's MM Pura onwards up to 2013. A valuable addition to the library of all homeopaths, whether students, practitioners or researchers.	●	39,95 (30.02 ex)
LALOR L. , Homeopathy and Psychiatry (This book comes with the Lalor module: see under modules)	 Quote: Most recently, a young Belgium homeopath asked me how to get more out of the Repertory. I suggested she slowly read through the <i>Delusion</i> rubrics, making sure to understand each one. It is this insight which makes me very happy to endorse this enormous work of Liz Lalor. The <i>Delusion</i> rubrics are treasures which need to be unlocked. Some homeopaths dismiss them altogether as delusions which are too difficult to rely upon. Liz Lalor has come up with a most interesting concept to not only understand these critical rubrics but to effectively use them in practice.	● Also part of Lalor module	Also part of Lalor module
