

Erik van Woensel

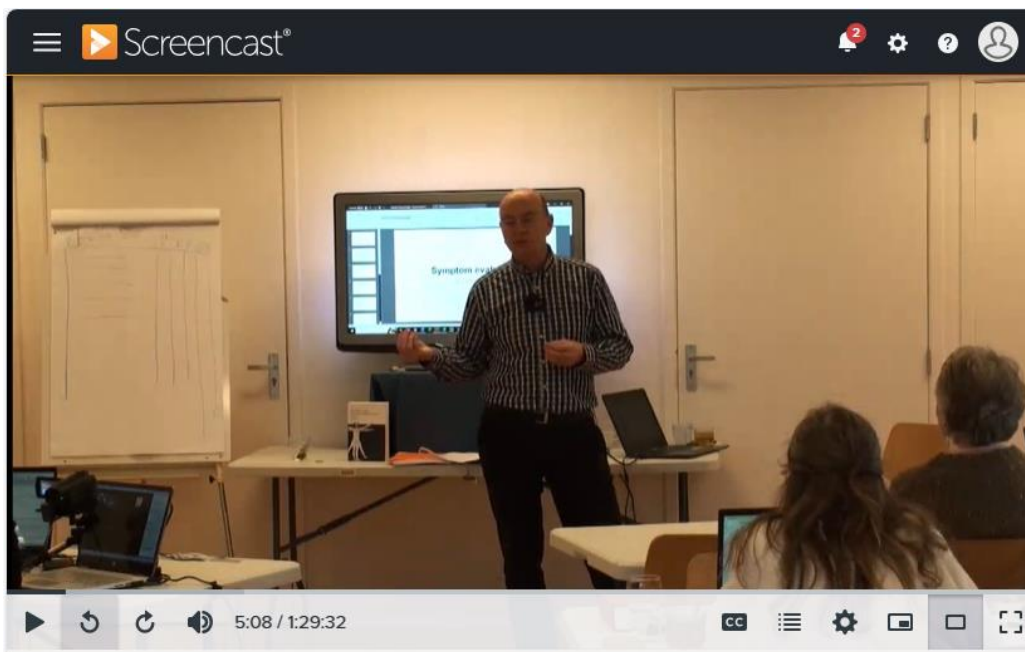

How to solve difficult cases

Lecture difficult cases

In this 1 ½ hour free lecture Erik van Woensel gives an introduction how to solve difficult cases in homeopathy. Many cases nowadays do not have clear symptoms due to several reasons. Erik explains how to approach such cases during the case analysis. Erik also gives two cases examples of such complicated cases.

See below the video link, and you need to enter the Password-sentence to access it. Because of the case examples, make sure you keep all information confidential and do not distribute the video link.

Repertory View

In RadarOpus 3.3.x a new Repertory View will be available created by Erik in which he made a selection of the almost 5000 homeopathic author or document sources, and made a selection of all those he finds reliable. The View is based on his 45 years' experience as a homeopath and teacher. Erik explains in the above video that it is important that you can rely on all the information in the repertory. The View will come available both in the **Synthesis 2009** and the **Synthesis Adonis-2024** version.

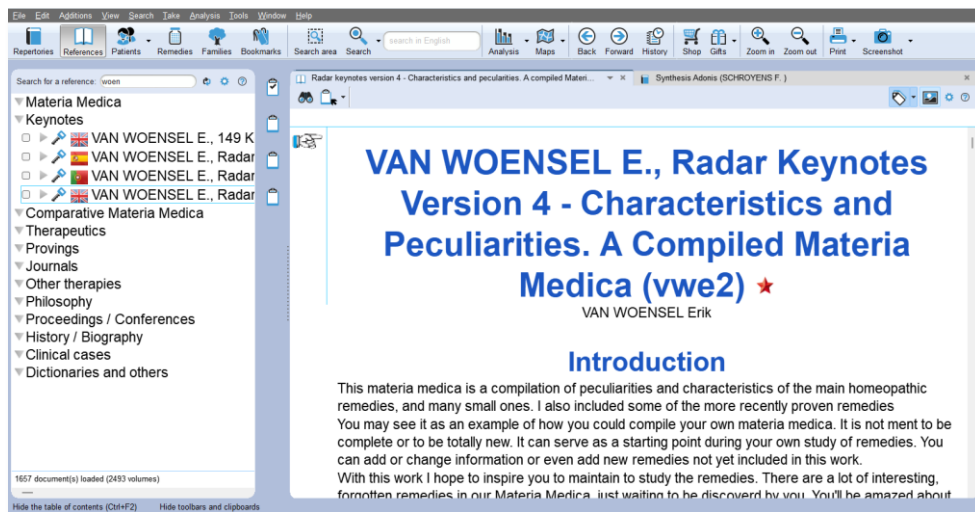

From the Views selection box at the top of the repertory window, you can select the “**Van Woensel E**” View. The View can be applied both in the repertory and in the analysis window.

Archibel – Erik van Woensel keynotes

The **Archibel keynotes edition 4**, which in RadarOpus 3.3 are called the **Van Woensel keynotes**, is probably the most often consulted short materia medica worldwide.

Erik is working on a new edition 5, which probably will come available during the second half of 2024.

Study with Erik van Woensel

If you are interested to study with Erik then you can contact him via his website www.erikvanwoensel.com

Besides teachings at several locations, Erik also offers online classes and online case supervision in several languages and levels.

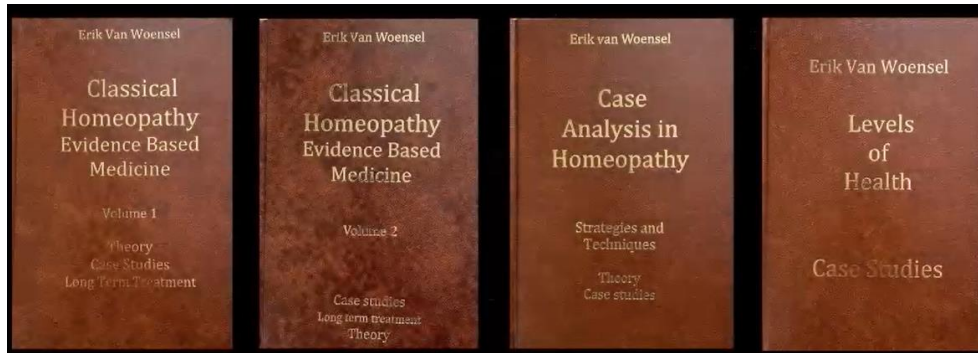

Books

Erik has published several books. Volumes 1 and 2 of “Classical Homeopathy Evidence Based Medicine” discusses not only the theory of Case Analysis, but also each book discusses the theory with around 50 example cases from the practice.

The book “Cases Analysis in Homeopathy” is a more concise book with only a few cases example, with also the theory of case analysis.

The book “ Levels of Health” explains with cases examples the theory brought forth by Vithoulkas about the levels of health.
